DETAILED ACTIONS

EXAMINER'S AMENDMENT

1. Applicant's election of claims 1-9 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 10-19.

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made FINAL.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 10-19.

REASONS FOR ALLOWANCE

3. Claims 1-9 are allowed.

4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests in claims 1: a ferroelectric film sandwiched between said lower and upper electrodes and having a perovskite crystal structure, wherein said ferroelectric film comprises: a La-containing region which is in contact with said lower electrode and contains La; and a Pb-containing region which is present on said La-containing region and contains Pb, and a La concentration in a lowermost surface of said La-containing region is higher than a La concentration in an uppermost surface of said Pb-containing region.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Mochizuki et al (6,190,957 B1): Method of Forming a Ferroelectric Device.
